

PETROCONSULT ENGINEERING

PETROCONSULT SOLUTIONS

Petroconsult Engineering is one of the leading engineering services, technical representation and business consulting organizations in Egypt serving the oil and gas industry, refinery chemical, petrochemical and power generation sectors.

Petroconsult Engineering Represents The Best Of The World's Leading Principals Renowned For Their Competitiveness, Performance, And For Continuously Being At The Forefront Of Cutting Edge Technology. Moreover, **Petroconsult** Engineering Has A Heritage Of Deeply Rooted Networks Of Alliances And Business Relationships Within Egypt's Oil & Gas Community. We Offer The Bridges Of Successful And Mutually Beneficial Business Between Our Foreign Principals And Local Clients.

We Connect Egypt And The World

Petroconsult Engineering Has Four Technical Divisions, Each Of Which Is Fully Geared To Transform It's Specific Field's Rising Challenges, Into Our Famous **Petroconsult** Professional Solutions.

In the year 2009 we celebrated our
30th Anniversary of continuous
success.

ABOUT PETROCONSULT

Petroconsult Engineering has been serving the Oil and Gas industry in Egypt as one of the leading engineering services, technical representation and business consulting organizations. Other areas of specialization include LNG, Refinery & Petrochemicals, Offshore & Marine and Water & Environment industries.

We aim to provide our principals with a full range of project related services starting from initial market intelligence to identifying and/or initiating projects with all the relevant needs of product and services to;

- front/end project analysis
- prequalification, tendering, contracting and assistance during execution
- commissioning and start up phase to further operational assistance with maintenance schemes and spare parts programs.

We also tackle all tasks related to local market support, such as:

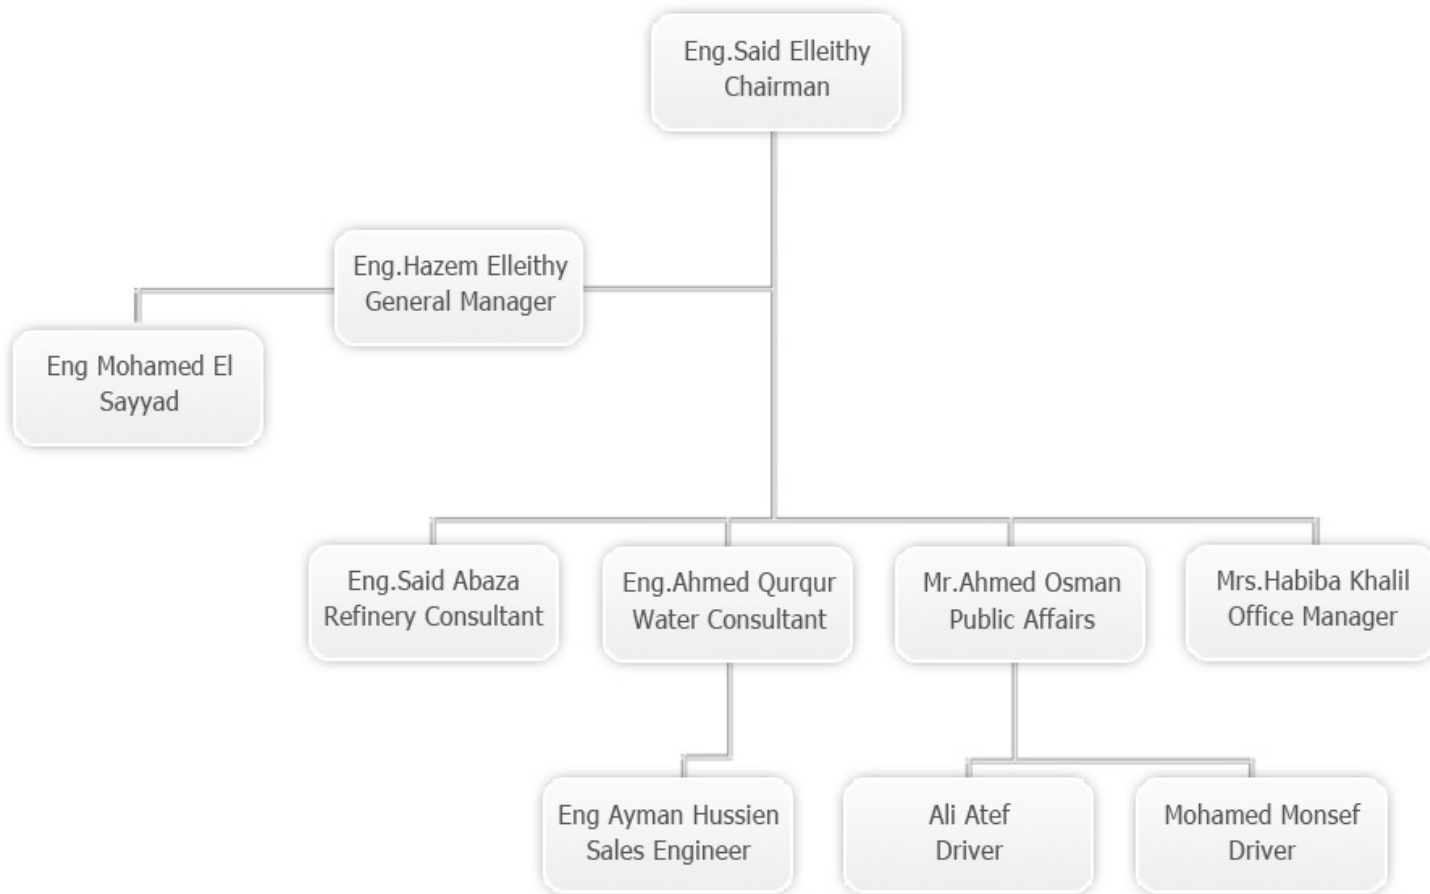

- conditions and availability of local labor, materials, suppliers and services;
- administration of regulations with the Egyptian government;
- application of local laws and regulation of taxation, customs, insurance environment, ... as well as introduction, intervention and interfacing with clients to smoothen or tighten bilateral relations and solving recurrent problems.

The range of our engineering services covers various project phases where we provide assistance and full local back up to our foreign principals and local clients.
